Rejoinder

Claims 114, 116, and 128-136 are directed to an allowable product. Pursuant to the procedures set forth in MPEP § 821.04(B), claims 123-127, and 137-141, directed to the process of making or using an allowable product, previously withdrawn from consideration as a result of a restriction requirement, are hereby rejoined and fully examined for patentability under 37 CFR 1.104.

Because all claims previously withdrawn from consideration under 37 CFR 1.142 have been rejoined, **the restriction requirement as set forth in the Office action mailed on 7/14/2009 is hereby withdrawn.** In view of the withdrawal of the restriction requirement as to the rejoined inventions, applicant(s) are advised that if any claim presented in a continuation or divisional application is anticipated by, or includes all the limitations of, a claim that is allowable in the present application, such claim may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Once the restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. See *In re Ziegler*, 443 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

Statement of Reasons for Allowance

Claims 114 and 116-141 are allowed.

The present claims are allowable over the closest prior art Waddington (US 6,111,006), Noda (US 6,808,75), Horowitz (US 6,228,934), and Gross et al (WO 97/07153) for the following reasons:

Waddington discloses a blend of two or more PHAs but fails to disclose a blend of two copolymers each with the same comonomers, wherein one of the comonomers is 3-hydroxybutyrate.

Noda discloses a blend of PHAs with formulae that read on the presently claimed comonomers, however, it only teaches that the PHAs are at least partially miscible or insoluble with each other.

Horowitz discloses blends of PHAs however it fails to disclose or suggest that the PHAs are miscible.

Gross et al discloses a blend comprising a copolymer of 72% 3-hydroxybutyrate and 28% 4-hydroxybutyrate and a copolymer of 10% 3-hydroxybutyrate and 90% 4-hydroxybutyrate, however, these polymers also contain small amounts of 3-hydroxyvalerate and ethylene glycol units and therefore fall outside of the claimed copolymer which *consists* of only two comonomers.

Thus, it is clear that the references, taken individually or in combination, do not disclose or suggest the claimed invention.

In light of the above, it is clear that rejections of record are untenable and thus the present claims are passed to issue.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
